DRUMHEAD SELECTION GUIDE

As the world's leading drumhead specialist, REMO®. Inc. has developed an incredibly wide variety of drumheads. Not only is a full selection available to meet the diverse needs of contemporary drumset players, REMO® heads also bring advanced technologies and exceptional performance capabilities to the specialized needs of players in the marching, concert, and world percussion areas.

Through the development of different drumhead designs, REMO® has been highly successful in refining and improving drumhead performance. In general, drumhead performance can be put into three main categories:

sound (tone, color, pitch, sustain),
feel (response, sensitivity) and
presence (durability, tuning range).

REMO® drumset drumhead types currently include; Clear, Coated, Smooth White™, Suede®, Renaissance®, Ebony®, and Fiberskyn® 3. REMO® World Percussion drumhead types currently include; Fiberskyn® 3 Nuskyn® and Skyndeep®. REMO® also has a variety of drumheads for Marching, Orchestral, and specialty applications. Each type, style and variety of head has its own tone, sustain and durability as rated in the performance profiles accompanying each head.

To further enhance performance levels, REMO® has also developed a variety of collar and hoop designs that provide optimum head response and vibration as well as easier mounting and tuning. These designs include curved, flat and low, medium, and high straight and angled collars as well as the proven technology of the original Weatherking®.

REMO® advances, coupled with REMO®'s commitment to serving the worldwide drumming community, have vastly improved the quality, consistency and variety of available drumheads. This is why most of the world's top drumset manufacturers and most of the world's top drummers use REMO® drumheads. No wonder REMO® drumheads are found on more recordings than any other drumhead.

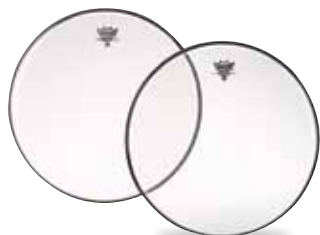

THE Greatest HEADS IN DRUMMING

For additional information on REMO® drumhead types, weights, collars and hoops, please see your REMO® quality retailer or visit remo.com.

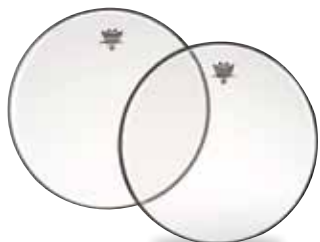

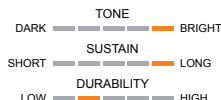

Clear Diplomat®, Ambassador®, Emperor®

BD-0314-00

◀ Diplomat®

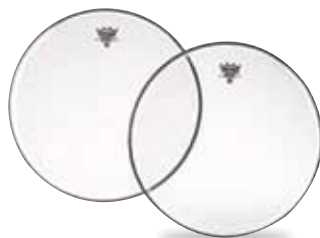

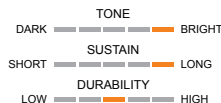

REMO®'s brightest, most open sounding head due to its single-ply of 7.5-mil Mylar® film. They're known for their bright tones, resonance, and sustain and as resonant (bottom) heads opening up the sound of tom toms.

BA-0314-00

◀ Ambassador®

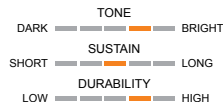

The **Clear Ambassador®** heads are medium-weight heads made with a single-ply 10-mil Mylar® film to produce an open, bright, and resonant sound with plenty of attack.

BE-0314-00

◀ Emperor®

Clear Emperor® heads are the brightest sounding of the classic clear 2-ply Weatherking® series, which account for their popularity among studio, pop, R&B, and rock drummers. They're made with two free-floating plies of 7-mil Mylar® film, which give consistent open warm tones.

Coated Diplomat®, Ambassador®, Emperor®

BD-0114-00

◀ Diplomat®

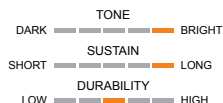

The **Coated Diplomat®** is slightly warmer than the **Clear Diplomat®** due to a coated single-ply 7.5-mil Mylar® film. They're known for their bright warm tones, resonance, and sustain. **Coated Diplomat®** heads are best known for accentuating snare drum response.

BA-0114-00

◀ Ambassador®

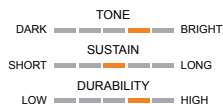

The **Coated Ambassador®** heads are medium-weight heads made with a coated single-ply 10-mil Mylar® film to produce a warm open, bright, and resonant sound with a warm attack. **Coated Ambassador®** heads are the standard of the industry for both live and recording situations.

BE-0114-00

◀ Emperor®

Coated Emperor® heads are warmer and more durable than **Clear Emperors®**. They're made with two free-floating plies of 7-mil Mylar® film, which gives consistent open warm tones which accounts for their popularity among many of today's Studio and Rock drummers.

Vintage A™ Ambassador® Coated

VA-0114-00

◀ Vintage A™

Vintage A™ drumheads feature the sensitivity and snare response of **Coated Diplomats®**, focused mid-range of **Coated Emperors®** and the longevity of **Coated Ambassadors®**. These unique features make **Vintage A™** drumheads one of the most versatile drumheads on the market today.

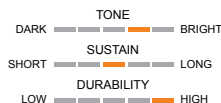

Vintage Emperor® Emperor®

VE-0114-00

◀ Vintage Emperor®

A reissue of the first **REMO Emperor®** drumhead that changed the art of drumming in the late 1960s. Constructed of two free-floating plies of 7.5-mil Mylar™ film that feature sensitivity and snare response of the Coated Emperor, accentuated mid and low frequencies and increased durability.

Renaissance® Diplomat®, Ambassador®, Emperor®, Powerstroke® 3

RD-0014-SS

◀ Diplomat®

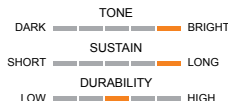

The Renaissance® Diplomat® is slightly warmer than Clear and Suede® Diplomat® due to a textured surface single-ply 7.5-mil Mylar® film. They're known for their rich warm tones, resonance, and sustain.

SA-0014-SS

◀ Ambassador®

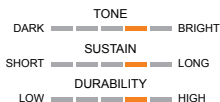

The Renaissance® Ambassador® heads are medium-weight heads made with a proprietary textured single-ply 10-mil Mylar® film to produce a warm open resonant sounds with a warm attack.

RE-0014-SS

◀ Emperor®

Renaissance® Emperor® heads are warmer than Clear Emperor®. They're made with two free-floating processed plies of 7.5-mil Mylar® film, which gives consistent open warm resonant tones.

Ebony® Ambassador® Powerstroke® 3, Powerstroke® 4, P3 Pre-Cut Hole

ES-1022-00

◀ Ambassador®

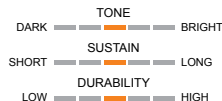

The **Ebony® Ambassador®** heads are medium-weight heads made with a single-ply 10-mil Mylar® film to produce an open, warm and resonant sound with plenty of attack. **Ebony® Ambassador®** heads are ideal for batter and resonant heads for tom toms and are known as the standard of the industry for front bass heads.

P3-1022-ES

◀ Powerstroke® 3

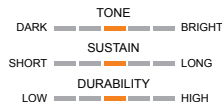

The **Ebony® Powerstroke® 3** features a thin underlay at the outer edge of the head to subtly dampen unwanted overtones. **Ebony® P3** heads are best known for use as a resonant bass drum head. This creates perfect balance of mid and low tones that has quickly made **Ebony® Powerstroke® 3** one of REMO's most preferred resonant bass drumheads.

P3-1022-ES-DM

◀ P3 w/Pre-Cut Hole

The **Ebony® Powerstroke® 3** features a thin underlay at the outer edge of the head to subtly dampen unwanted overtones. It comes available with a DynamO reinforced pre-cut 5" hole in the front for air release and miking situations.

If you think artists are demanding sound perfectionists, how about the guys who compete for their business? The ones who have to improve the sound quality of their kits everyday – or get left behind. One thing that keeps them at their competitive best is their choice of drumheads.

For over 50 years REMO® has been the Original Equipment Manufacturer drumhead of choice. Because after building the most advanced shells in the business, they don't want to sacrifice sound quality by using inferior heads. Don't take our word for it. Just listen.

And also: Adinolfi Alternative Percussion, Advanced Percussion, American Drum Co., Clevelander, D'Amico, ddrum, Eames, Enoch,

Kolberg, Lang Percussion, Majestic, Meinl, Mid-East Manufacturing, Monolith Composite Co., Musix, Sleishman, Tour Timps, Van Der Glas.

The finest drum manufacturers

choose Remo drumheads.

Pinstripe® Clear, Coated, Ebony®

Clear

PS-0314-00

Clear Pinstripe® heads are made with two free-floating plies of 7-mil Mylar® with a layer of ring reducing agent applied between them. This makes them ideal heads for the “fat” sounds of Pop, Rock and R&B and for those who want a low pitched sound with moderate attack and response characteristics.

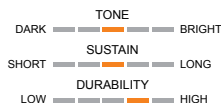

Coated

PS-0114-00

Coated Pinstripe® heads are made with two free-floating plies of 7-mil Mylar® with a layer of ring reducing agent applied between them. This makes them ideal heads for the “fat” sounds of Pop, Rock and R&B and for those who want a low pitched sound with warm attack and response characteristics.

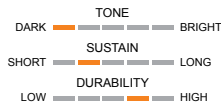

Ebony®

ES-0614-PS

The **Ebony® Pinstripe®** heads are made with two (10- & 5-mil) Mylar® plies with a measured layer of a ring reducing agent applied between them at the outer edge of their trademark stripe to dampen high frequency overtones for warm resonance. **Ebony® Pinstripe®**s quick decay makes them ideal heads for the “fat” sounds of Rock and R&B and for those who want more low end sounds with moderate attack and response characteristics.

Powerstroke® 3 Clear, Coated, Smooth White™

Snare/tom-tom: 10-mil Mylar® with a 2-mil Mylar® underlay
 Bass: 10-mil Mylar® with a 10-mil Mylar® underlay

Clear ▶

The **Clear Powerstroke® 3** features a thin underlay at the outer edge of the head to subtly dampen unwanted overtones. This creates a near-perfect balance of response and tone control that has quickly made **Powerstroke® 3** one of REMO®'s most preferred drumheads.

Powersonic® Clear, Coated

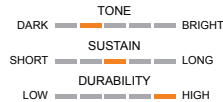

PW-1322-00

PW-1122-00

Powersonic®

Powersonic® Bass Drumheads have controlled mid-range and low-end for the most powerful bass drum sound. Constructed of 2 plies, 7-mil plus 5-mil, of Mylar®, with two specifically placed internal subsonic dampening rings, an external snap-on dampening system and included Falams® Slam for more attack. The external snap-on dampening system lets you customize your sound three ways for different playing situations.

Tattoo Skyn™

Tattoo Skyn™ Drumheads utilize exclusive artwork designs by Corey Miller of the world famous TV show, L.A. Ink; Serpent Rose and Skulls. Snare heads feature a unique 12-mil **Suede® Skyndeeep®** single-ply film for excellent durability and overtone control. Bass resonant heads feature 10-mil films of black film or white film in contrasting graphics.

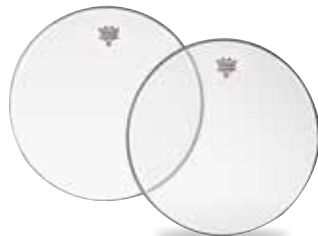

Snare Side

**Diplomat[®], Ambassador[®],
Emperor[®], Black Suede[™]**

◀ Diplomat[®]

The **Hazy Diplomat[®]** is a single-ply of 2-mil Mylar[®] designed as the perfect resonant head for snare drums. They're known for their bright warm tones, resonance, and sustain. **Hazy Diplomat[®]** heads accentuate snare drum response.

Snare Batter

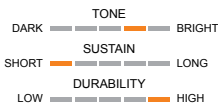

**Black Max[®], White Max[®],
Powerstroke[®] 77**

KS-0614-00

Black Max[®] & White Max[®]

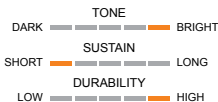

Combining an extremely durable Technora Aramid Fiber weave with REMO's Duralock[®] reinforced counterhoop, Black Max[®] and White Max[®] give you the best of both worlds by providing maximum tone and projection with crisp articulation and a slightly softer feel. The preferred snare batter for drumline, marching band, indoor and drum corps applications.

KS-2614-00

Cybermax[®]

Providing the ultimate in high tension durability with a crisp short tone and maximum projection, the **Cybermax[®]** was developed in conjunction with pipe drum legend Jim Kilpatrick. The head feels great to play and is incredibly responsive, no matter how high the tension is set. Ideal for pipe drums and all marching applications that require higher tension.

Tenor

Crimplock®: Clear Pinstripe®, Ebony® Pinstripe®, Smooth White™ Emperor® Crimplock®

PS-0314-MP

Clear Pinstripe® Crimplock®

The most popular tenor drumhead in the world. Combining two plies of 7-mil clear Mylar® with a proprietary dampening process, the marching **Pinstripe®** is renowned for its projection, pitch definition, sustain and durability.

Ebony® Pinstripe® Crimplock®

Combines the sound of the legendary Clear Pinstripe® with the bold, contemporary look of Ebony®. Featuring a top ply of smooth Ebony® film, along with Remo's proprietary Pinstripe® dampening agent, and a clear bottom ply for improved projection and heat dissipation. The Ebony® Pinstripe® Tenor drumhead is perfect for all marching applications.

PS-0414-MP

Smooth White™ Emperor® Crimplock®

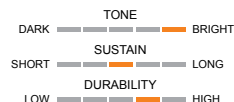

For those seeking bright projection with enhanced mid-range frequencies, the **Smooth White Emperor®** features two plies of 7.5-mil film. The 6" "spock" model is often combined with Pinstripes and Suedes for a different voice in multi-tom configurations.

a. The Crimplock hoop is a hybrid design combining a crimped leg over the WeatherKing® poured channel technology. This locks the film into the collar for added strength and durability, while increasing tuning stability and projection in high-tension marching applications.

Tenor Crimplock: Suede® Emperor®, Black Suede® Emperor®, Renaissance® Emperor®

BE-0814-MP

◀ Suede® Emperor® Crimplock®

Combining two plies of 7.5-mil specially-treated Mylar, the marching **Suede® Emperor®** is a favorite of those seeking a drier, more articulate sound with controlled sustain.

ES-0814-MP

◀ Black Suede™ Emperor® Crimplock®

Loud, articulate and melodic, the **Black Suede™ Emperor® Crimplock** tenor drumhead features a top ply of high strength **Ebony®** film, treated with REMO®'s legendary **Suede®** process, combined with a single-ply clear film bottom layer for improved sustain and heat resistance. With a distinct, focused tone and a softer feel, **Black Suede™** tenor drumheads sound as great as they look.

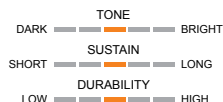

RE-0014-MP

◀ Renaissance® Emperor® Crimplock®

Combining two plies of 7.5-mil specially-treated film, the marching **Renaissance® Emperor®** features a warm, focused sound with increased articulation and controlled sustain.

TC - Clear/Hazy

Custom series heads are ideal for timpanists looking for excellent projection with a bright, clear, focused sound. Available with steel, low-profile steel or aluminum insert rings for greater tuning consistency and reliability.

REMO® offers 3 types of timpani heads in either Hazy or Clear films. Clear offers improved projection and sustain while Hazy is preferred for its warmth and articulation. Also available are three types of insert rings for the Custom and Renaissance series, providing greater tuning consistency, sustain and projection.

TI - Weatherking(R) timpani heads are ideal for most scholastic applications.

TC - Custom series are renowned for their resonance, clarity and projection.

RC - Renaissance are the preferred choice of most timpani manufacturers and concert percussionists, combining the look and feel of calfskin with warm, articulate overtones and a controlled musical sustain.

The two-letter suffix for all timpani head part numbers designates the insert ring type and film type.

R Aluminum Insert **S** Steel Insert **L** Low-profile Steel Insert

S is for Clear film **A** is for Hazy film

NOTE: Yamaha Symphonic Series come standard with Remo Renaissance clear with Aluminum Insert rings. Adams Philharmonic are equipped with Remo Renaissance Hazy with low-profile steel insert rings.

"TI" standard timpani heads do not have inserts.

Specify the suffix "00" for Hazy film and "03" for Clear film.

Renaissance® heads feature a warm, dark, focused sound with full-range projection. Providing the look and feel of calfskin with outstanding tonality and consistency, Renaissance® timpani heads are excellent for all concert applications. Featuring a unique, specially treated film, combined with a choice of steel, low-profile steel or aluminum insert rings, Renaissance® are the overwhelming choice of professionals worldwide

Timpani Head Selection Table

Heads to fit non-standard drums may be special ordered as Custom Drumheads. For replacement Timpani heads, check the hoop of the original head for correct model number or consult this chart. For custom sizes not listed previously, please contact the REMO® Customer Service Department.

To determine the bowl size of your timpani, measure from the outside edge of the bowl straight across the circumference to the opposite outside edge.

Conga Drumheads *Tucked*

REMO®'s tucked drumhead technology is a process in which the film is wrapped around a steel insert ring just as animal skins are "tucked" around flesh hoops. The results? REMO® has created a more durable drumhead that can withstand the extreme amounts of tension that are needed for many world percussion instruments.

Bongo Drumheads

Upgrade your sound with REMO® synthetic bongo drumheads. For superior sound, durability, and weather-resistance choose from REMO®'s wide selection to fit your drum; from R Series, S Series, and Tucked bongo drumheads.

R-Series bongo drumheads sizes fit more "Regular" or full size model bongo drums from most major manufacturers.

S-Series bongo drumheads fit more of the "Small" entry level bongo drums from most major manufacturers.

Tucked bongo drumheads are the most durable for players that like to pitch the drums very high.

RotoToms®

RotoToms are built with a rapid-tuning system, allowing for instant tuning in a range of more than one octave. Tuned to the high range, they produce excellent Latin percussion sounds. Equipped with timpani heads, they produce the timbre of timpani but with a distinctive tone. Their versatility has led to the widespread use of RotoToms in recording studios, soundtracks, percussion ensembles and symphonic music.
